EDUCATION

Holy Angel University

Bachelor of Science in Computer Science; Magna Cum Laude

Angeles City, Philippines
2022-2026

- Honors & Awards:** Consistent President's List & Dean's List honoree (2022–2025)
- Relevant Coursework:** Database Management Systems, Systems Architecture, Web & Mobile Engineering

TECHNICAL SKILLS

- Languages:** Python, JavaScript, TypeScript, PHP, Dart, SQL
- Frontend & Mobile:** React, Flutter, Tailwind CSS, HTML5, CSS3
- Backend & Databases:** MS SQL Server, Firebase, RESTful APIs, Webhooks
- Generative AI & Media:** Google Flow (Omni Models), Multimodal Prompt Engineering, Character Seed & Identity Anchoring, 3D/CGI Render Directing, Synthetic Voice Profiling & Lip-Sync
- Tools & Multimedia:** FFmpeg, yt-dlp, Git, GoHighLevel (GHL) Automation Engine, CapCut Pro, Motion Tracking & Dynamic Audio Design

WORK EXPERIENCE

La Rose Noire Philippines

Full Stack Web Developer Intern

Clark, Philippines
Dec 2025 - March 2026

- Honored with the "Most Outstanding Developer Award" (March 2026) for delivering enterprise web systems.
- Engineered 7 enterprise systems (Driver Request, Gate Pass, Uniform Inspection, MP3 Streamer) using PHP and MSSQL, automating administrative and logistics workflows.
- Architected multi-tier approval pipelines, biometric authentication, and QR-based geo-tracking to ensure zero data discrepancies across high-traffic internal operations.
- Redesigned UI/UX interfaces for 4 internal platforms (Driver Request, Emeals Schedule, QR Task Check, Employee Feedback Hub) with responsive layouts, increasing cross-departmental user engagement.
- Designed relational MSSQL database schemas and automated CSV/PDF report generators, streamlining enterprise dispatch pipelines and employee service records.

PROJECTS

Facebook Phishing Detector (Capstone Project) | Python, JavaScript, Firebase

2025

- Engineered a real-time browser extension utilizing heuristic pattern-recognition algorithms to automatically detect and classify malicious phishing posts on Facebook.
- Built a client-side DOM obfuscation layer to dynamically blur deceptive content and quarantine threat vectors before user credential exposure.
- Integrated a Firebase cloud backend to log threat telemetry, aggregate emerging attack signatures, and synchronize detection rules dynamically.

GoHighLevel CRM Architecture & Automation Engine | GHL, Webhooks, SQL, CSV Migration

2026

- Architected a decoupled 3-stage event-driven pipeline (Notification, Lead Qualifier, Auto-Reply Router) automating client onboarding for an international sports agency.
- Consolidated ~40 redundant custom fields into a normalized 20-field Master Schema across 4 athletic modules, decreasing data overhead by 50%.
- Enforced strict primary-key deduplication and automated CSV migration routines using COALESCE logic, achieving 100% workflow execution reliability across 5 intake endpoints.

Battle Chess Tactical Engine | React, TypeScript, HTML, CSS

2026

- Programmed a tactical strategy game reimagining classic chess with combat mechanics, custom stat allocation (HP/ATK/DEF), dynamic elemental terrain, and a 3-tier class system.
- Engineered a custom rendering engine with responsive client state management and dynamic cinematic battle overlay animations.

Sulyap Kapampangan | Dart, Flutter, Firebase

2024

- Created an interactive cross-platform mobile application supporting Kapampangan language preservation through gamified quizzes and cultural archives.
- Synchronized user progress, real-time leaderboards, and offline-first state using Firebase Realtime Database.

CERTIFICATIONS & RECOGNITIONS

- Most Outstanding Developer Award — La Rose Noire Philippines Mar 2026
- AWS Cloud Foundations — Amazon Web Services Mar 2025
- CCNAv7: Introduction to Networks — Cisco Networking Academy May 2024
- Cyber Threat Management & Cybersecurity Essentials — Cisco Nov 2024
